Not Due to Economy-Trust Pays for 'Reading Matter" to Show Benevolence -Pipe Lines Give Absolute Control of Crude Petroleum.

Washington, Jan. 29 .- The most terrifle arraignment of the Standard Oil company yet made by either private or public investigators was that filed with Congress yesterday by the interstate mmerce commission. Every conceivable corporate crime,

from discrimination and false representation to bribery, corruption of the press and debauchery of public officials, is conand decauted by or public officials, is con-tained in the catalogue of charges.

After a long and painstaking inves-tigation ordered by Congress, in which hundreds of witnesses were examined in various cities, and ample opportunity was given the oil monopoly to defend itself, the commission makes a report that completely overshadows the sensa-tional disclosures revealed in the report

of commissioner of corporations Garileld on the same subject last May.

The commission's report says in part:

The ruin of its competitors has been a distinct part of the policy of the Standard Oil company in the past, systematically

eally and persistently pursued.

The commission long ago pointed out that the railway schedules of this country were filled with discriminations of this character in favor of the Standard Oil company, which could not, as the law then stood, be corrected. The commission refers to its report or decision in the New York, New Haven & Hart-ford railroad case, which involved refusal of that road to join in through rates upon petroleum, as it did upon other commodities, and wherein it was shown that the Standard thereby obtained a monopoly of the territory covered by that railroad system and directly put into its treasury between \$200,000 and \$300,000 per year. Rexall Americanitis Elixir is one of the 300 Rexall Remedies. It is a tonic nerve food composed chiefly of free Phosphorus, Glycophosphates, Iron Pyrophosphates and Calisava.

The wonderful results of this remedy are due to the fact that it supplies Phosphorus to the nerve cells in a condition in which it can be immediately and easily taken up by them.

The Glycophosphates, actual nerve-tissue builders, are one of the most recent and valuable additions to this branch of medicine and unquestionably a more efficient remody than the well-known Hypophosphites.
